Fine Arts

This exhibition presents the combination from earlier artwork and new artistically unique “Pearls of Earth” using Florida’s natural coconuts. Notable for their specially developed craftsmanship by hand. Abstract, designed candles, and colorful crafted shells will be showcased.

With her silent, spiritual nature and background working with children and adults over the years, her enigmatic, powerful work as medium reveals connection and understanding. It shows the commitment between creativity and experience as a professional coach, mediator and hypnotist.

Celebrate the display, while experiencing the ambience of the architecture and the beautiful waterfront terrace house together with samples of wine and delicious small bites.

***The Exhibition takes place at the residence of Kaizer Talib:
